INTRODUCTION TO IPR

- ▶ The word Property is always closely associated with society.
- ▶ Properties always gives an unique identity to an individual as well as organization
- ▶ Economic theory says that the value of a property depends on the gap between demand and supply.
- ▶ This is also applicable to intangible properties as well

Asha Madavi (Presenting)

Patents

- ▶ **Patents:** Is a monopoly right granted to a person, who invented a new product or process of making an article, for **20 years** under the Indian Patens Act, 1970, and can be renewed after expiration of period. The inventor has to file for patent first, and then make his/ her invention to public. A patent has to be applied in each country by the inventor, to claim his rights in that country.
- ▶ Eg: A group of scientists working on new drug development in Himalaya Drugs for some salary. The patent of the drug developed is given to Himalaya Drugs, but not to the scientists. The drug may have many patents like composition, process, and product etc.

Types of Patents

- **Utility Patent:** Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title. (35 U.S.C. § 101) E.g: (functional) toys, coatings, tools, machines, good for 20 years
- **Plant Patent:** Whoever invents or discovers and asexually reproduces any distinct and new variety of plant, including cultivated spores, mutants, hybrids, and newly found seedlings, other than a tuber propagated plant or a plant found in an uncultivated state... (35 U.S.C. § 161)
 - No bacteria or similar single-cell organisms need apply!
- **Design Patent:** Whoever invents any new, original, and ornamental design for an article of manufacture may obtain a patent. (35 U.S.C. § 171). E.g: (non-functional) a decoration, apparel, jewellery
 - Can easily be designed around...no functionality to protect
